

Lila Angelaka

Lila Angelaka is a Senior Technical Officer in Historic Environment Scotland's Technical Research Team. Her background is in architecture and conservation, and she worked in various architectural practices and heritage organisations, before joining HES in 2013, as a Historic Buildings Adviser Officer in Heritage. In her current role, she provides technical conservation advice, both internally and externally, and she is involved in various energy efficiency retrofit pilot projects. She is also responsible for the writing and editing of a number of HES's technical publications, such as the *Technical Papers* and *Refurbishment Case Studies*. Recently, she has also been part of delivering livestreamed Q&A events about maintaining and retrofitting older buildings, called 'Inform Fridays'.
