

WH:UK and the Research Agenda Position paper v1. Sept 2017

Why research matters to WHUK and its partners

Research has been on the WHUK agenda ever since the organisation's earliest inception. The Board took the view that well founded research would help to increase understanding of the UK's sites and help achieve educational objectives related to WHUK's charitable objectives. Moreover encouraging the publication and sharing of research increases the status and standing of WHUK as a an authoritative and knowledgeable expert body, well fitted to speak of the Sites and to represent their interests. Knowledge is power!

In 2016 WHUK Professor Ian Wray and Dr. Carol Ludwig at Liverpool University in the Department of Civic Design undertook an extensive survey of partners to identify their research interests and needs (Ian Wray is Vice Chair of WHUK with a special interest in research issues). This was an open ended survey and was written up in the report 'Towards an Outline Research Strategy' available on the WHUK web site here: https://worldheritageuk.org/2016/10/11/towards-an-outline-research-strategy-for-world-heritage-uk/

The survey asked partners what sort of research WHUK should encourage and possibly commission. Based on the responses ten key research themes were identified: planning, tourism, visitor management, financial support, culture and identity, economic benefits and brand value, education and learning, environmental pressures, evaluation, and sharing research and data.

Sharing our research knowledge and contacts

Following discussion at the last annual WHUK conference in Caernarfon, Jamie Davies volunteered to take the research agenda forward with Ian Wray and was appointed by the Board as Honorary Head of Research for World Heritage UK.

Jamie Davies is a teaching fellow in cultural heritage at the Ironbridge International Institute for cultural heritage, University of Birmingham delivering modules for the World Heritage Studies MA and International Heritage Management MA. He is in the final stages of a PhD researching on Education at World Heritage Sites- How are World Heritage Values communicated within the formal learning process. Jamie is a Heritage Lottery Fund Committee member for Wales (2016-2019).

One key early task will be sharing, collating and promoting past research from UK World Heritage Sites, being aware of current research and identify opportunities for university/site collaborative research. We are taking this forward by creating a **World Heritage Research Directory** and a

Researcher Directory, helping to take forward the UK Government Culture White Paper, which stated:

We want to set a global standard in the stewardship of World Heritage Sites. By working with the World Heritage Centre, the governing bodies for World Heritage Sites, Historic England and others, we will promote sustainable development while ensuring our sites are protected.

Department for Culture, Media & Sport 2016

Three Year Action Plan

In consultation with WHUK Vice Chair, the Head of Research has drawn up a three-year research action plan, which was approved by the Board earlier this year, and includes the following objectives:

- To Create and update a UK World Heritage Bibliography.
- To create and update a UK World Heritage Researchers Directory.
- To survey UK Universities about their relationship with the UNESCO World Heritage Programme and identify past, current or future research. This would complement the survey of UK World Heritage Sites about their research agendas.
- To strengthen the relationship between the UNESCO Chairs network and UK World Heritage sites.
- To develop a closer research relationship between heritage and research organisations and the UK World Heritage Site network for example the knowledge sharing about past, present or planned research.

On the following pages, you will find the **UK World Heritage Bibliography** and **UK World Heritage Researcher Directory**. Both are living documents and will require constant updating and additions.

Please contact Jamie Davies, if you can add to the bibliography, want to be added to the directory, suggest corrections or want to discuss research opportunities.

UK World Heritage Bibliography

This is a bibliography relating to publications about World Heritage Sites in the UK. The relate to the inscription, its management or the World Heritage programme. This list includes BA, MA and PhD research as well as those published as articles or in books. It is important that Universities work with WH:UK to include unpublished student research from all levels of academic. Policy research is also included in this bibliography.
